

Starke County Community Education Grant

Community Education Grants are specifically for schools or teachers in the Knox, North Judson-San Pierre, and Oregon-Davis School systems. **Awards are \$1,500.00 for each school system.**

Projects can be focused in any subject area. In general, grants are awarded to ideas implemented during the regular academic school day and year. However, teachers may apply for funding for extra-curricular projects that are curriculum based. Religious-based projects will not be funded.

Name of School: Oregon-Davis High School

Person Applying/Title: Kathleen Roberts / CTE Family and Consumer Science Teacher

Email: kroberts@od.k12.in.us Phone: 574 250-2783

Date Submitted: Sept 6, 2022 Amount Requested: \$655.95 Number of Students: 65

Grade Level/Subject: 9 - 12 / CTE FACS Courses (Culinary, Food Science, Nutrition)

Project Title: Lab Preparation

Projected Timeline: Semester 1

Principal's Signature or Approval: *Emily Dullall* Date: 9/9/22

- Attach as a separate document:**
- A description of the project including goals and objective.
 - Any additional information about the project, invoices, or receipts.

Starke County Community Education Grant

Kathleen Roberts / CTE Family and Consumer Science Teacher

The Oregon-Davis High School Family and Consumer Science Department (FACS) lab area is currently in transition from the traditional FACS department to more of an authentic commercial food service food preparation lab. Culinary / Hospitality , Food Science and Nutrition courses are all taught in the lab area. We are partnering with Ivy Tech to teach the three dual credit courses.

HOSP 101 (ServSafe)

HOSP 104 Nutrition

AGRI 104 Food Science

Since all of these courses teach about the basic food safety and sanitation, it is vital and important that our students have the opportunity to work with authentic commercial food preparation work areas and food preparation equipment. Stainless steel work areas are required in commercial settings to help maintain a safe and sanitary environment. Stainless steel is much easier to clean repeatedly than normal residential surfaces. Therefore, to provide our students with a more authentic lab experience we are transitioning to stainless steel surfaces as much as possible. Students will retain and relate better to the concepts being taught if they are able to use authentic tools and equipment. Also, having a lab environment which can be sanitized and kept clean will be beneficial to all the CTE courses taught in the FACS lab. This grant would help us move forward in our transition.

Goal

Transition our current FACS lab to a more of a commercial food preparation work area.

Objectives

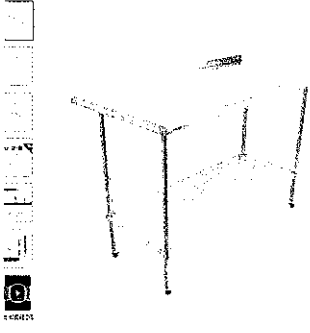

(Listed below are a few of the standards from the HOSP 101 course.)

- Recognize sanitary and safety design and construction features of food production equipment and facilities. (i.e., NSF, UL, OSHA, ADA, etc.).
- Understand steps of a sanitation self-inspection and identify modification necessary for compliance with standards.
- Recall laws and rules of the regulatory agencies governing sanitation and safety in foodservice operation.
- Develop cleaning and sanitizing schedules and procedures for equipment and facilities.
- Differentiate current types of cleaners and sanitizers and their proper use.
- Describe the requirements for proper receiving and storage of both raw and prepared foods.
